

Pine Class Newsletter

Autumn Term 1 : October 2026

Dear Parents

Pine Class have had an incredible learning experience through the preparation and holding of our Bake Sale. We have spent time reading and understanding recipes, creating flyers to advertise the bake sale and designing a huge banner. We wrote ingredients lists, and price labels and this was all before we started baking! The children followed the recipes and used their maths skills to weigh and measure the correct amounts. They worked collaboratively and took turns to mix and then learnt how to pipe icing for the decorations. We also learnt about the importance of hygiene when cooking and about allergens. Here are our fabulous creations...

Thank you to the rest of the school for supporting us by buying cakes- we raised £66!

Other Pine Class news: We are continuing our learning about materials in sciences and carried out a test to find the best materials for a puppy's bed, thinking about the properties the materials would need. We have also continued to learn about castles and will shortly be designing and building castles out of junk. If you have any small cardboard boxes or tubes you can send in we would be very grateful.

Finally, please can all items coming into school be clearly named. I am finding coats, jumpers, PE kit and outdoor learning kit everywhere and with no names it is proving to be very tricky to reunite items with their owners. Thank you.
